# 智能安全系统

## Smart safety system

### 停电应急疏散装置

Power failure emergency evacuation device

当停电时，自动进入应急平层模式，电梯就近平层开门。

When there is power failure, the elevator will automatically enter the emergency leveling mode, and the elevator will open the door on the nearest leveling.

### 安全边框保护

Safe border protection

平台三面设有安全边框，当有异物卡滞，电梯即停。

There are safety borders on three sides of the platform, the elevator will stop when getting stuck.

### 物联网远程监控

IoT remote monitoring

电梯故障时自动报警，手机可实时观测异地电梯的参数及运行状态。

When the elevator fails, it will automatically alarm, and the mobile phone can observe the parameters and running status of the elevator in other places in real time.

### 一键呼叫系统

One-key calling system

当电梯故障时，可直接呼叫设置好的5个联系人号码。

When the elevator fails, you can directly call the set 5 contact numbers.

### 门防夹保护功能

Door anti-clip protection function

门开闭时，如遇堵转，自动反向开启。

When elevator door is opened and closed, it will automatically open in the reverse direction in case of locked-rotor.

### 安全静音

Safe and silent

无接触器智能电子控制。

Intelligent electronic control without contactor.

### 时刻保障安全、平稳、舒适

Ensure safety, stability and comfort at all times

变频控制系统，结合磁栅尺精准定位，平层精确。为您提供安全、舒适、静音的乘梯体验

Frequency conversion control system, combined with magnetic ruling ruler, accurate positioning and leveling. To provide you with a safe, comfortable and quiet elevator taking experience.

# 绿色科技， 让生活更加美好

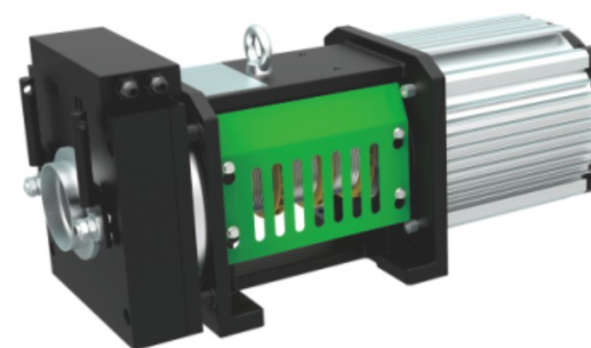

*Green technology make life better*

专为家用电梯而设计的钢带曳引机与传统无齿轮曳引机相比，技术领先，性能可靠，优势明显。

1. 高效节能
2. 钢带与曳引轮、轿底轮无滚动无声摩擦，减少噪音干扰。
3. 钢带1200万次疲劳寿命和抗拉强度实验，性能超过传统钢丝绳，通过国外TUV测试验证。
4. 曳引机和制动器等通过等同于国家曳引机标准的型式实验，通过国家电梯检测机构委托测试和莱茵TUV检测机构CE认证。
5. 自主知识产权，技术领先，拥有多项发明和实用型新专利。目前，是国内自主品牌领先的钢带曳引电梯整机供应商。

Compared with traditional gearless traction machines, the steel belt traction machine specially designed for home elevators has leading technology, reliable performance and obvious advantages.

1. High efficiency and energy saving
2. There is no rolling and silent friction between the steel belt and the traction sheave and the bottom wheel of the car to reduce noise interference.
3. The steel belt has 12 million cycles of fatigue life and tensile strength experiments, and its performance exceeds that of traditional steel wire ropes. It has been verified by foreign TUV testing.
4. The traction machine and brake have passed the type test equivalent to the national traction machine standard, passed the test commissioned by the national elevator testing agency and the Rheinland TUV testing agency CE certification.
5. Independent intellectual property rights, leading technology, and possessing a number of inventions and practical new patents. At present, it is the leading supplier of steel belt traction elevators for domestic independent brands.

尺寸：长580x宽220x高315mm 重量：80kg  
瑞典SKF轴承，德国Heidenhain编码器  
适用电压：单相220V、380V、415V

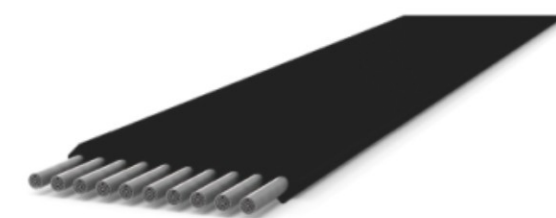

Size: L580xW220xH315mm  
Weight: 80kg  
Sweden SKF bearings, German heidenhain encoder  
Supply power: Single phase 220V, or three phases 380V and 415V

## 永磁动力 Permanent magnet power

永磁同步传动和数字变频技术相结合，比一般传统技术可节省能源33%以上。无需添加、更换油脂，无污染，低噪音。

Integrating permanent magnet synchronous drive technology and digital frequency conversion technology, which can save more than 33% of energy compared to the general traditional technology. No need to add or replace grease, no oil pollution, low noise

厚度：4mm  
破断拉力：37000-47000N  
疲劳寿命：1200万次

Thickness: 4mm  
Broken tension force: 37000-47000N  
Fatigue life: 12,000,000 times

## 节能控制 Energy saving control

LED高效节能照明灯，电梯停用时自动熄灭，节省用电，绿色环保。

LED efficient and energy-saving light. It will automatically go out when the elevator is not in use, which saves electricity and is environmentally friendly.
